SUMMARY

AI/ML Engineer and Generative AI Intern specializing in multi-agent systems, LLM orchestration, and RAG pipelines. Experienced with LangGraph, LangChain, LlamaIndex, and MCP-based agentic workflows. Proven ability to deliver production-grade AI applications with measurable performance improvements.

EDUCATION

JSS Academy of Technical Education, Bangalore

Aug 2023 – Jun 2027

Bachelor of Engineering in Computer Science & Engineering (AI & ML)

EXPERIENCE

TensorHub Technologies Pvt. Ltd.

Mar 2026 – Present

Generative AI Intern

- Developed enterprise-grade multi-agent AI systems and GenAI applications for workflow automation using [LangGraph](#), [LangChain](#), and [LlamaIndex](#)
- Built a GitHub Multi-Agent System using [GitHub MCP](#) where specialized agents collaboratively analyze issues, generate code fixes, and automate pull request creation
- Engineered parallel agent execution pipelines using [Redis](#) and [BullMQ](#) to enable scalable concurrent task processing
- Implemented intelligent LLM, [MCP](#), and tool-routing mechanisms using [Python](#) to dynamically select optimal models and resources based on user intent

TECHNICAL SKILLS

- Languages:** Python, Java, JavaScript, C
- AI/ML Frameworks:** LangGraph, LangChain, LlamaIndex, Transformers, PyTorch, TensorFlow, Scikit-Learn, RAG, MCP, NLP, Deep Learning
- Web Frameworks:** FastAPI, Flask, Django, Streamlit, React
- Cloud & DevOps:** AWS, Docker, MLflow, DagsHub
- Databases:** MongoDB, ChromaDB, FAISS, Redis, Vector Databases
- Coursework:** Data Structures & Algorithms, Machine Learning, Deep Learning, NLP, Database Management, Operating Systems, Computer Networks

PROJECTS

Deceiver – Multi-Agent Social Deduction AI Game | [FastAPI](#), [React](#), [LangGraph](#), [LangChain](#), [Groq](#) | [🔗](#) | [🔗 Live](#)

- Architected a real-time detective-noir social deduction game orchestrating **6+ autonomous AI agents** simultaneously via [LangGraph](#), eliminating manual game-master intervention entirely
- Engineered a stateful event-driven architecture using [FastAPI](#) WebSockets, reducing average turn-response latency by **40%** compared to polling-based designs
- Delivered a responsive [React](#) UI supporting real-time voting phases, dynamic role assignment, and animated game progression with zero page reloads

Legal AI – EU AI Regulations Chatbot | [Python](#), [LangChain](#), [ChromaDB](#), [Streamlit](#), [Gemini 2.5 Flash](#) | [🔗](#)

- Built end-to-end ingestion and retrieval pipeline using [LangChain](#) and [ChromaDB](#) with top-k similarity filtering to cut irrelevant context in responses
- Integrated [Gemini 2.5 Flash](#) embeddings and generation, achieving **sub-2s** response times for complex multi-clause legal queries on free-tier deployment
- Shipped an interactive [Streamlit](#) interface enabling non-technical legal teams to query compliance documents in plain English with cited source references

LexiScan – AI Contract Analysis System | [DistilBERT](#), [FastAPI](#), [PyTorch](#), [Docker](#), [PyMuPDF](#) | [🔗](#) | [🔗 Live](#)

- Fine-tuned [DistilBERT](#) on **53,000+ legal clauses** across **16 contract categories**, achieving **92% weighted F1-score** – outperforming zero-shot GPT-4 by **11 points**
- Built a high-throughput PDF parsing pipeline using [PyMuPDF](#) processing **50-page contracts in under 3 seconds** with clause-level boundary detection
- Optimized [Docker](#) deployment via multi-stage builds, shrinking container image by **1.5GB** and cutting cold-start time by **35%**

AWARDS & CERTIFICATIONS

AXIOM Hackathon (SJBIT)	Winner	Rs.50,000	Nexathon'25	Winner	Rs.25,000	📄 Certificates
IDEATHON (GAT)	Runner-Up	Rs.15,000	AIKYAM 2025	Runner-Up	Rs.5,000	

Certifications: [📄](#) Data Science, Machine Learning, Deep Learning, NLP – Udemy | Generative AI – Oracle

[📄 Claude Certified Architect – Foundations](#) (Anthropic)
